

## CLAIMS

What is claimed is:

1. A system for reproduction of sound in a motor vehicle, comprising:

a sound reproduction system including at least one bass reflection box equipped with a bass reflection pipe and/or a bass reflection opening and at least one built-in speaker;

said bass reflection box being arranged in a side compartment of the interior of the vehicle and including a wall oriented toward the interior of the vehicle;

said wall of the bass reflection box oriented toward the interior of the vehicle, comprising:

at least in part, a sound-transmissive lid;

a second wall having depressions therein located behind the lid; and

at least one tool being arranged between said second wall and said lid.

2. The system according to claim 1, further comprising the lid having at least one swing articulation whose axis of swing is oriented parallel to a floor of the interior of the vehicle, located in front of the bass reflection box.

3. The system according to claim 2, wherein the axis of swing is located in close proximity above the floor of the interior of the vehicle.

4. The system according to claim 1, further comprising a side compartment located behind a rear wheel box of the vehicle superstructure.

5. The system according to claim 1, wherein the service tool kit to be stowed on the bass reflection box includes at least a jack, a wheel nut tube wrench, and a lever for rotating the wheel nut wrench about its longitudinal axis.

6. The system according to claim 1, wherein the several tools of the service tool kit are arranged in recesses provided in the wall and are thereby dynamically and/or geometrically fixed in said recesses.

7. The system according to claim 1, wherein the bass reflection opening is arranged above or to one side of the lid.

8. The system according claim 1, wherein at least one dynamic speaker is arranged behind the sound-transmissive lid.

9. The system according to claim 1, wherein the bass reflection box is removable arranged in the side compartment of the vehicle.

10. The system according to claim 9, wherein the removable bass reflection box is equipped with an extension cable at least five meters in length.

11. The system according to claim 1, wherein said at least one tool further comprises a service tool kit and emergency aids.
